

Daniel C. Patiño

Senior Data Engineer (Databricks)

danielcarvajalpatino@gmail.com | +57 311 531 5773 | Bogotá, Colombia | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Data Engineer with 6+ years across retail, fintech, and trading. Core platform Databricks: Delta Lake, jobs, orchestration, Unity Catalog, and Terraform. Python, SQL, GCP, BigQuery, and enterprise-scale ETL pipelines.

PROFESSIONAL EXPERIENCE

Senior Data Engineer
Farmatodo

Mar 2023 - Present
Bogotá, Colombia

- Core Databricks platform: migration and operation of the lakehouse (Delta Lake, jobs, orchestration, Unity Catalog, monitoring, and alerts)
- Infrastructure as Code with Terraform on Databricks and GCP; SOLID principles and clean code in production pipelines
- Co-led BigQuery Data Warehouse with 5+ enterprise sources and data domains (customers, sales, products, promotions)
- ETL/ELT pipelines in Python and Spark with data quality, idempotency, and robust failure handling for API and batch integrations
- Managed GCP services: BigQuery, Cloud Run, Cloud Functions, IAM, Secrets Manager; integration with Databricks workloads
- Contributed to data and ML governance standards applied across the Databricks workspace

Data Engineer
Ultracom (Cliente: Bancolombia)

Apr 2022 - Mar 2023
Medellín, Colombia

- Maintained and evolved components of Bancolombia's enterprise Data Warehouse (SQL/Python, batch jobs, dimensional adjustments and ingestion for business needs)
- Migrated Python pipelines to Cloudera CDP Public Cloud, aligning dependencies and deployment for more elastic scaling under load
- Deployed Django APIs on AWS (DynamoDB, Glue, S3, CloudFormation) exposing lake data and operations to internal consumers
- Applied code reviews and production deployment quality gates (testing standards) for Python services on AWS

Data Engineer
Frontierx

Jul 2018 - Mar 2022
Medellín, Colombia

- Architected real-time data pipelines feeding algorithmic trading models
- Developed robust ETLs for financial market data processing
- Implemented production visualization and monitoring system for trading strategies
- Processed and transformed high-resolution satellite imagery for predictive models

EDUCATION

Master's Degree in Engineering Universidad de Antioquia	May 2019 - Nov 2022 Medellín, Colombia
• Research focus: Deep Learning under Professor Raúl Ramos Pollán's supervision • Thesis: Impact of synthetic data (GANs) on commodities trading predictions • Indexed scientific publication in Research in International Business and Finance (2022)	
Systems Engineering Universidad Industrial de Santander	Sep 2013 - Aug 2018 Bucaramanga, Colombia
• Thesis: Urban socioeconomic stratification estimation using CNNs applied to satellite imagery	

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript
Databricks & Lakehouse: Databricks (Lakehouse), Apache Spark / PySpark, Delta Lake, Workflows & Jobs, Unity Catalog, MLflow, Terraform (Data-bricks)
Data Engineering: ETL/ELT Pipelines, Data Warehousing, Data Modeling, Data Quality
Cloud (GCP & AWS): BigQuery, Cloud Run, Cloud Functions, Compute Engine, S3, DynamoDB, CloudFormation
SQL & Databases: PostgreSQL, MySQL, Oracle, SQL Server
