

Daniel C. Patiño

Senior Data Engineer

danielcarvajalpatino@gmail.com | +57 311 531 5773 | Bogotá, Colombia | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Data Engineer with 6+ years designing scalable data architectures across retail, fintech, and trading. Expert in Python, SQL, Linux, GCP, AWS, Databricks, and Terraform. Strong experience in ETL pipelines and enterprise Data Warehouses.

PROFESSIONAL EXPERIENCE

Senior Data Engineer
[Farmatodo](#)

Mar 2023 - Present
Bogotá, Colombia

- Co-led Data Warehouse design and construction in BigQuery, integrating 5+ enterprise data sources
- Architected ETL pipelines in Python with proactive monitoring, automated alerts, and robust error handling
- Participated in Databricks migration: job orchestration, monitoring dashboards, and alerting system
- Implemented Infrastructure as Code with Terraform, following SOLID principles and clean code
- Built enterprise data domains (customers, sales, products, promotions) with data quality validation
- Configured and managed GCP services: BigQuery, Cloud Run, Cloud Functions, IAM, Secrets Manager

Data Engineer
[Ultracom](#) (Cliente: [Bancolombia](#))

Apr 2022 - Mar 2023
Medellín, Colombia

- Part of the maintenance team for Bancolombia's Data Warehouse
- Migrated Python scripts to CDP Public Cloud, improving scalability
- Deployed Django APIs on AWS (DynamoDB, Glue, S3, CloudFormation)
- Certified and optimized Python code for production deployment

Data Engineer
[Frontierx](#)

Jul 2018 - Mar 2022
Medellín, Colombia

- Architected real-time data pipelines feeding algorithmic trading models
- Developed robust ETLs for financial market data processing
- Implemented production visualization and monitoring system for trading strategies
- Processed and transformed high-resolution satellite imagery for predictive models

EDUCATION

Master's Degree in Engineering
[Universidad de Antioquia](#)

May 2019 - Nov 2022
Medellín, Colombia

- Research focus: Deep Learning under Professor Raúl Ramos Pollán's supervision
- Thesis: Impact of synthetic data (GANs) on commodities trading predictions
- Indexed scientific publication in Research in International Business and Finance (2022)

Systems Engineering
[Universidad Industrial de Santander](#)

Sep 2013 - Aug 2018
Bucaramanga, Colombia

- Thesis: Urban socioeconomic stratification estimation using CNNs applied to satellite imagery

TECHNICAL SKILLS

LANGUAGES

Languages:
Python, SQL, JavaScript/TypeScript

Data Engineering:
ETL/ELT Pipelines, Data Warehousing, Data Modeling, Data Quality

Databricks & Spark:
Databricks, Apache Spark, Delta Lake, Terraform

Cloud (GCP & AWS):
BigQuery, Cloud Run, Cloud Functions, Compute Engine, S3, DynamoDB, CloudFormation

SQL & Databases:
PostgreSQL, MySQL, Oracle, SQL Server

Spanish Native
English C1 Advanced

CERTIFICATIONS

EF SET English Certificate (C1 Advanced)
EF Education First • Feb 2023
