

# Daniel C. Patiño

## Semi-Senior Data Scientist

danielcarvajalpatino@gmail.com | +57 311 531 5773 | Bogotá, Colombia | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

Data Scientist & ML Engineer with 6+ years deploying production ML models across retail, fintech, and trading. Expert in Python, SQL, Linux, TensorFlow, PyTorch, and GANs. Published researcher on synthetic data in trading. OOP and rigorous experimentation.

### PROFESSIONAL EXPERIENCE

**Data Scientist**  
[Farmatodo](#)

Mar 2023 - Present  
Bogotá, Colombia

- Built user affinity system based on purchase behavior patterns, improving customer segmentation
- Developed monitoring dashboards and metrics analysis to measure personalization impact
- Designed multi-channel marketing attribution model to quantify strategy effectiveness
- Led exploratory data analysis and presented actionable insights to business stakeholders
- Built interactive analytical dashboards for real-time decision making

**Data Engineer**  
[Ultracom \(Cliente: Bancolombia\)](#)

Apr 2022 - Mar 2023  
Medellín, Colombia

- Part of the maintenance team for Bancolombia's Data Warehouse
- Migrated Python scripts to CDP Public Cloud, improving scalability
- Deployed Django APIs on AWS (DynamoDB, Glue, S3, CloudFormation)
- Certified and optimized Python code for production deployment

**Data Scientist & ML Engineer**  
[Frontierx](#)

Jul 2018 - Mar 2022  
Medellín, Colombia

- Researched and developed generative models (GANs) for synthetic trading data, publishing in indexed scientific journal
- Deployed market prediction models using TensorFlow and PyTorch in production
- Designed and deployed algorithmic trading strategies based on behavioral patterns
- Built Computer Vision models with CNNs for satellite image classification
- Researched impact of synthetic data on trading predictions (published master's thesis)

### EDUCATION

**Master's Degree in Engineering**  
[Universidad de Antioquia](#)

May 2019 - Nov 2022  
Medellín, Colombia

- Research focus: Deep Learning under Professor Raúl Ramos Pollán's supervision
- Thesis: Impact of synthetic data (GANs) on commodities trading predictions
- Indexed scientific publication in Research in International Business and Finance (2022)

**Systems Engineering**  
[Universidad Industrial de Santander](#)

Sep 2013 - Aug 2018  
Bucaramanga, Colombia

- Thesis: Urban socioeconomic stratification estimation using CNNs applied to satellite imagery

### PUBLICATIONS

TECHNICAL SKILLS

---

**Languages:**  
Python, SQL, JavaScript/TypeScript

**Machine Learning & AI:**  
TensorFlow, PyTorch, scikit-learn, GANs, CNNs, Time Series

**Data Analysis:**  
Pandas, NumPy, Matplotlib, Jupyter, Feature Engineering

**SQL & Databases:**  
PostgreSQL, MySQL, Oracle, SQL Server

**Development:**  
Git, Docker, Linux, CI/CD, Clean Code, Design Patterns
