

Daniel C. Patiño

Senior Data Engineer & Scientist

danielcarvajalpatino@gmail.com | +57 311 531 5773 | Bogotá, Colombia | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Engineer & Scientist with 6+ years designing scalable data architectures, robust ETL pipelines, and production ML models. Expert in Python, SQL, Linux, GCP, Databricks, TensorFlow, and PyTorch. Published researcher on GANs.

PROFESSIONAL EXPERIENCE

Data Scientist & Engineer Mar 2023 - Present
Farmatodo Bogotá, Colombia

- Co-led Data Warehouse design and construction in BigQuery, integrating 5+ data sources (Oracle, Braze, Amplitude, Algolia)
- Architected ETL pipelines in Python with proactive monitoring, automated alerts, and error recovery
- Participated in data infrastructure migration to Databricks, implementing IaC with Terraform and clean code principles
- Built user affinity scoring system with monitoring dashboards, improving offer personalization
- Implemented multi-channel marketing attribution system, enabling ROI analysis per strategy and channel

Data Engineer Apr 2022 - Mar 2023
Ultracom (Cliente: Bancolombia) Medellín, Colombia

- Part of the maintenance team for Bancolombia's Data Warehouse
- Migrated Python scripts to CDP Public Cloud, improving scalability
- Deployed Django APIs on AWS (DynamoDB, Glue, S3, CloudFormation)
- Certified and optimized Python code for production deployment

Data Scientist & Developer Jul 2018 - Mar 2022
Frontierx Medellín, Colombia

- Researched and developed generative models (GANs) for synthetic commodities data, resulting in indexed scientific publication
- Implemented and deployed algorithmic ML-based trading strategies for commodities markets
- Built predictive models for portfolio positioning in the Spanish energy market
- Processed and analyzed satellite imagery with Robosat for Computer Vision projects

EDUCATION

Master's Degree in Engineering May 2019 - Nov 2022
Universidad de Antioquia Medellín, Colombia

- Research focus: Deep Learning under Professor Raúl Ramos Pollán's supervision
- Thesis: Impact of synthetic data (GANs) on commodities trading predictions
- Indexed scientific publication in Research in International Business and Finance (2022)

Systems Engineering Sep 2013 - Aug 2018
Universidad Industrial de Santander Bucaramanga, Colombia

- Thesis: Urban socioeconomic stratification estimation using CNNs applied to satellite imagery

PUBLICATIONS

Synthetic data generation with deep generative models to enhance predictive tasks in trading strategies
Research in International Business and Finance, 2022

TECHNICAL SKILLS

Languages:

Python, SQL, JavaScript/TypeScript

Machine Learning & AI:

TensorFlow, PyTorch, scikit-learn, GANs, CNNs, Time Series

Data Engineering:

ETL/ELT Pipelines, Data Warehousing, Data Modeling, Data Quality

Databricks & Spark:

Databricks, Apache Spark, Delta Lake, Terraform

Data Analysis:

Pandas, NumPy, Matplotlib, Jupyter, Feature Engineering

LANGUAGES

Spanish

Native

English

C1 Advanced

CERTIFICATIONS

TensorFlow Developer Professional Certificate

Coursera (DeepLearning.AI) • Sep 2019

Deep Learning Specialization

Coursera (DeepLearning.AI) • Jun 2019

Build Basic Generative Adversarial Networks (GANs)

Coursera • May 2021

EF SET English Certificate (C1 Advanced)

EF Education First • Feb 2023
