

Daniel C. Patiño

Senior Data Scientist

danielcarvajalpatino@gmail.com | +57 311 531 5773 | Bogotá, Colombia | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Scientist with 6+ years in advanced modeling, deep learning, and peer-reviewed research (GANs, trading, computer vision). TensorFlow, PyTorch, and rigorous experimentation; applied experience in retail and financial markets.

PROFESSIONAL EXPERIENCE

Machine Learning Engineer Mar 2023 - Present
Farmatodo Bogotá, Colombia

- Led experimentation and evaluation for personalization and multi-channel campaign models; metric design and business-facing readouts
- Framed business questions as ML and analytics problems: segmentation, affinity, and attribution in a retail context
- Designed exploratory analyses and reproducible reporting (Jupyter/SQL) to support marketing and product decisions
- Documented findings for non-technical stakeholders; data storytelling from hypothesis to impact
- Engineered features and training datasets from behavioral and campaign signals

Data Engineer Apr 2022 - Mar 2023
Ultracom (Cliente: Bancolombia) Medellín, Colombia

- Maintained and evolved components of Bancolombia's enterprise Data Warehouse (SQL/Python, batch jobs, dimensional adjustments and ingestion for business needs)
- Migrated Python pipelines to Cloudera CDP Public Cloud, aligning dependencies and deployment for more elastic scaling under load
- Deployed Django APIs on AWS (DynamoDB, Glue, S3, CloudFormation) exposing lake data and operations to internal consumers
- Applied code reviews and production deployment quality gates (testing standards) for Python services on AWS

Data Scientist & ML Engineer Jul 2018 - Mar 2022
Frontierx Medellín, Colombia

- Researched and developed generative models (GANs) for synthetic trading data, publishing in indexed scientific journal
- Deployed market prediction models using TensorFlow and PyTorch in production
- Designed and deployed algorithmic trading strategies based on behavioral patterns
- Built Computer Vision models with CNNs for satellite image classification
- Researched impact of synthetic data on trading predictions (published master's thesis)

EDUCATION

Master's Degree in Engineering May 2019 - Nov 2022
Universidad de Antioquia Medellín, Colombia

- Research focus: Deep Learning under Professor Raúl Ramos Pollán's supervision
- Thesis: Impact of synthetic data (GANs) on commodities trading predictions
- Indexed scientific publication in Research in International Business and Finance (2022)

Systems Engineering Sep 2013 - Aug 2018
Universidad Industrial de Santander Bucaramanga, Colombia

- Thesis: Urban socioeconomic stratification estimation using CNNs applied to satellite imagery

PUBLICATIONS

Synthetic data generation with deep generative models to enhance predictive tasks in trading strategies
Research in International Business and Finance, 2022

TECHNICAL SKILLS

Languages:
Python, SQL, JavaScript/TypeScript

Databricks & Lakehouse:
Databricks (Lakehouse), Apache Spark / PySpark, Delta Lake, Workflows & Jobs, Unity Catalog, MLflow, Terraform (Data-bricks)

Machine Learning & AI:
TensorFlow, PyTorch, scikit-learn, GANs, CNNs, Time Series, MLOps / Model governance

Data Analysis:
Pandas, NumPy, Matplotlib, Jupyter, Feature Engineering

SQL & Databases:
PostgreSQL, MySQL, Oracle, SQL Server

LANGUAGES

Spanish	Native
English	C1 Advanced

CERTIFICATIONS

TensorFlow Developer Professional Certificate
Coursera (DeepLearning.AI) • Sep 2019

Deep Learning Specialization
Coursera (DeepLearning.AI) • Jun 2019

Build Basic Generative Adversarial Networks (GANs)
Coursera • May 2021

EF SET English Certificate (C1 Advanced)
EF Education First • Feb 2023
